**F.O.H**  
For the light desk we need 1m<sup>2</sup> space in the F.O.H. We use the lights from the venue.

Below is an example of how it could be:

Legend:

- 4x 1000W PC /LED Front & side lights
- 6x Movinglight Spot with CMY !
- 8x Floorspots LED with shutter!
- 4x 4 Lite Blinder
- 1x Haze with Fan No Smokemachine !!!
- Free space we need for our projection and the lasers

**We bring:**

- 2 Lasers by Minuit Une Carré
- Lightdesk Grand MA Command wing & faderwing

**We need:**

- A bright projector 16:9
- All the cables for the projector
- the band will control the visuals so we need the DVI cable on stage.
- A white screen as big as possible to project our visuals on it.
- 8 LED floorspots with a shutter channel
- Power and DMX cables for the lasers (Laser addresses are 400 - 500)

**Good to know**

**Festivals:**  
I need 1 hour operating time with live access on stage. Please let me know when the slot will be.

Please send the patch one week before the show to the adress below.

We very much appreciate your willingness and look forward to working with you!

**LIGHTPLOT, TOUR 2020**  
**MONUMENTAL MEN**  
v. january 2020
